About Us

Welcome to my portfolio. Hello, I'm Vaddi Sanjeev Kumar,

a dedicated software developer with expertise in web development and proficiency in various programming languages and frameworks. I have a strong track record of optimizing user experiences and system performance through responsive design, efficient data retrieval, and database optimization. In my recent internship at Edunet Foundation (IBM SkillsBuild), I worked on a Front-End Cloning App using HTML, CSS, Bootstrap, JavaScript, and jQuery. I improved user experience and responsiveness, integrated APIs, and ensured consistent performance across various devices. As a Django Developer Intern at Shias Info Solutions Private Limited, I contributed to an Equipment Leasing project, streamlining customer operations, improving efficiency, and enhancing data security. I achieved a increase in customer operation efficiency and reduced errors by 25%. During my time at Mood Indigo IIT, Bombay, I successfully completed an E-Commerce Shopping Website project using PHP, implementing user authentication, and optimizing web performance, resulting in a 30% increase in customer conversion rate. I hold an MCA dearee from MITS, JNTU Anantapur, and a B.Sc. in Computer Science from SCNR Govt Degree College. I've also earned certifications in Java Application Development, Google Data Analytics, Front-End Development (Edunet – IBM SkillBuild), Python Programming, and AWS Cloud Architecture. With strong problem-solving skills, technical expertise, and a collaborative mindset, I am confident in my ability to contribute to impactful solutions and success in any organization.

Education

MCA (Master of Computer Application) in Computer Applications (2023)

MITS – Madanapalle, JNTU Anantapur, Andhra Pradesh

B.Sc. (Bachelor of Science) in Computer Science (2021)

SCNR Govt Degree College – Proddatur, YV University, Andhra Pradesh

MPC (Maths Physics Chemistry) 10+2 (2018)

Govt Junior College – Proddatur, BIEAP, Andhra Pradesh

10th (2016)

Sri Saraswathi Vidya Mandir High School – Proddatur, S.S.C, Andhra Pradesh

Professional

Summary

I am a skilled and passionate web developer with experience in different tools and technologies. I am an experienced and dedicated software developer with expertise in web development and a strong proficiency in various programming languages and frameworks.

Programming

I have a strong grasp of the fundamentals of Python programming and Core Java, including data types, control structures, and functions. A web framework is a software framework that is designed to support the development of web applications. Django is the most popular Python web framework and I have a good knowledge of it, including Django ORM.

Web Design

I have strong knowledge of HTML, CSS, and JavaScript, which are the three core technologies, and frameworks like Bootstrap and jQuery. I build responsive websites that look great on desktops, tablets, and smartphones. UX design is about creating digital products that are useful, easy to use, and delightful to interact with, and SEO is the process of optimizing structure to improve its visibility.

BackEnd

I have strong knowledge of backend technologies like Django and JDBC, and databases such as MySQL and MongoDB for handling CRUD operations.

Version Control System

I have solid knowledge of version control, including branching, merging, and conflict resolution, using tools like Git (Distributed Version Control Systems or DVCS). I also have skills in CI/CD (Continuous Integration/Continuous Deployment).

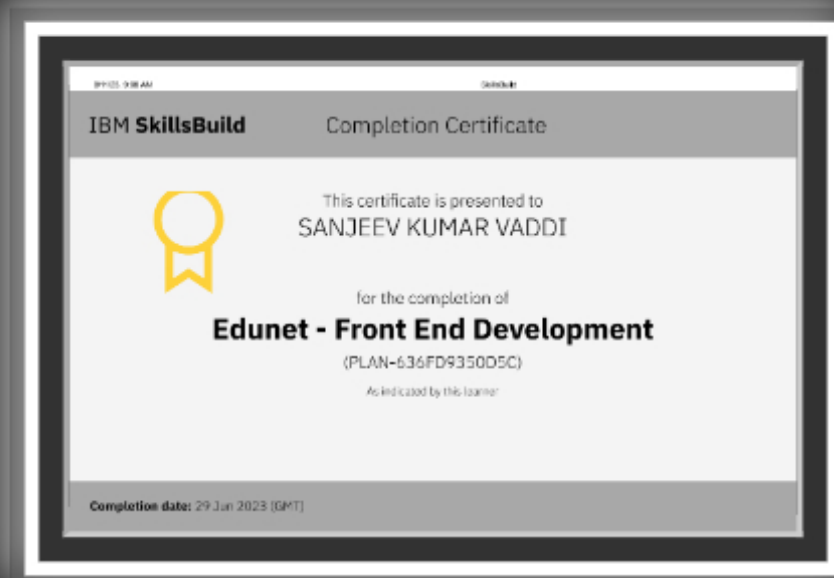

Problem-Solving

My problem-solving skills include parallel thinking, which is crucial for optimal performance. This involves considering multiple aspects of a problem simultaneously and evaluating different perspectives.

My Certifications

In pursuit of excellence, I have earned several certifications, each

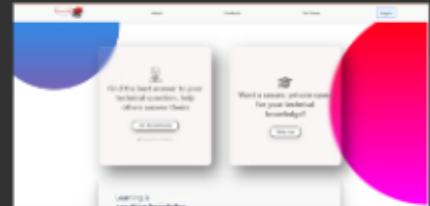

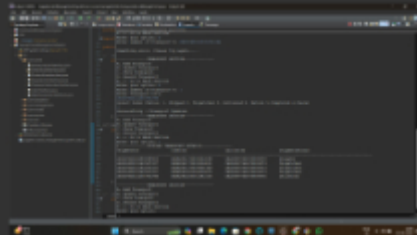

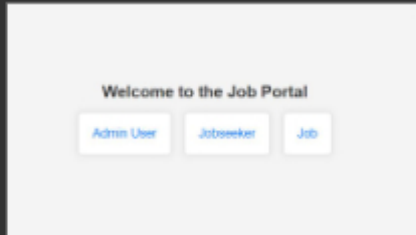

[See More](#)

My Projects

In my recent project, I developed a robust e-commerce website using cutting-edge technologies such as React.js and Node.js, showcasing my proficiency in full-stack development. I led a cross-functional team in the successful implementation of a data analytics solution, utilizing Python and SQL to derive

actionable insights and optimize business processes. As a skilled machine learning engineer, I designed and implemented a natural language processing (NLP) model, enhancing the accuracy of sentiment analysis in customer feedback for a major client.
